

Referral Letters & Email Templates

Now is a great time to let non surgeon clinicians in your area know that this option is available. Use this template to communicate with physicians who refer patients to your practice. Only use approved copy and claims form Hologic when promoting the Acessa procedure.

Title/subject: Patients struggling with Fibroids? The Acessa™ procedure now available as alternative to hysterectomy.

Dear **[Name of Colleague]**:

I am pleased to announce that **[practice name]** is now offering **[or the first in the area to offer]** a new treatment for symptomatic uterine fibroids – the Acessa™ procedure.

I am sending you this letter because you may have patients in your practice who suffer from symptoms related to fibroids and who may benefit from this procedure.

The Acessa procedure uses clinically proven radiofrequency volumetric thermal ablation technology to **shrink fibroids over time while sparing the myometrium**¹. The Acessa procedure is a laparoscopic outpatient procedure using intraabdominal ultrasound, which identifies more fibroids than other standard imaging methods.¹ Patients can expect to see rapid and significant resolution of symptoms and return to work in 4-5 days¹. Based on two clinical studies, treatment using the Acessa procedure has been shown to

- > significantly reduce menstrual blood loss, symptom severity, and fibroid and uterine volume¹
- > significantly increase health-related quality of life¹
- > identify 1.5x more fibroids than MRI and 2x more fibroids than transvaginal ultrasound²
- > result in a high rate (94%) of patient satisfaction¹

The Acessa procedure may be right for your patients who:

- > have been diagnosed with symptomatic uterine fibroids
- > have not responded to hormone therapy
- > want to preserve their uterus
- > are seeking a minimally invasive procedure with quick recovery.

If you have patients who are suffering from fibroids and might benefit from the procedure, please have them contact our office to learn more **[contact information]**.

[insert personal experience/testimonial with the Acessa procedure] I am happy to answer any of your questions.

Regards,
[Physician Name]
